DAY: Tuesday

NATURE: Barren

POLARITY: Masculine

DIRECTION: East

TAROT CARD: IV Emperor

Venus is in detriment (weak) in Aries

Saturn is in fall (weak) in Aries

The Sun is exalted (strong) in Aries

## LOVE:

You take the same approach to love that you do in every area of your life, Aries. You view dating as a fun game, a competition between you and everyone else, and you don't mind having to fight for someone a little. Actually, if they have other people who'll compete with you for their attention, you're even more interested. You have a hard time being tied down, loving your independence and the fun of dating too much. It can be hard for someone to hold your attention as well. You need someone who will keep you on your toes, with energy that matches yours, and has an equally positive outlook on life. They need to be their own person and be able to take care of themselves so you can have the independence you crave. Once you do commit to someone, you can be a fun person to be in a relationship with, as long as they don't need to check in all of the time. Clingy isn't something that you're into. You can also have a temper, but it's always short-lived, and no matter how bad the fight is, you rarely hold a grudge. For the most part, you forgive and forget quickly.

The signs that you're most compatible with are usually the signs in the same element as yours, which are Leo and Sagittarius. These two signs share in your energy, enthusiasm, and spunk. Leo will bring the warmth you need into your life, and Sagittarius will bring the intellectual stimulation. Leo can bring out the romantic in you, and Sagittarius can bring out the adventurer. You'll be sure to have a good time with either of them, and feel comfortable with them. Your opposing zodiac sign is

usually the one you have the most sparks with, and for you, that's Libra. Their indecision may infuriate you, their cool demeanor baffles you, and their compromising solutions test your must-win spirit, but there won't be any passion missing, and it'll always be interesting as you challenge one another on a constant basis to grow in ways you never would otherwise.

## **MONEY & CAREER:**

When it comes to money, you have a hard time holding on to it. You don't think too far into the future, so you're not big on financial planning, and it takes a while before you learn the art of saving. You have no trouble spending when the mood strikes you, and you can be an impulse shopper, so you should leave cash and credit cards at home if you don't want to spend money you shouldn't. You insist on doing things yourself, but financial planning may be the one area you should consider getting help with.

When it comes to your profession, you do best in environments where you're the boss or you mostly work on your own. Having a group to take into consideration isn't your thing, having a partner to check in with irritates you, and having someone else call the shots and tell you what to do sets you off. You need plenty of freedom to do as you please. With all of your energy, you can do a lot of work, but with how easily you get bored and jump into something else, it's hard for you to see work through. Since you like physical activity, some of you would be

good athletes or personal trainers, or work in sports. Since you like to work on your own, you can be a good entrepreneur or business owner, if you stick with things long enough. As long as you have a grip on your own anger (and ego), you can make a good boss because you know how to lead people. Ultimately, any career you go into should be one that holds your interest. Some other professions for Aries are: soldier, police officer, firefighter, optometrist, arson investigator, physical therapist.

## **HEALTH:**

You tend to be a pretty healthy sign, with accidents being your main issue, especially as a kid. You have so much energy and are constantly going, and you don't always pay attention to what's around you. Remember, never run with scissors! As for actual health issues, Aries rules the head, so you can suffer from headaches or migraines, especially if you're stressed out, as well as fevers. You can also experience issues with your nose (like bad sinuses), ears (like ear infections), eyes (like sties), or skin (like acne).

## **CHILD & PARENT:**

As a child, you were always going, and probably resisted going to sleep. You always wanted to be doing something and needed lots of physical activity. Also very competitive, you were likely involved in some sort of sport, though it took a while to learn good sportsmanship. You banged

your head a lot and got many cuts and scrapes. You didn't like to do things anyone's way but your own.

As a parent, you're always positive, and encourage your child to have an active life. When most parents lose steam, you're still going, and you can keep up with a rambunctious toddler and busy teenager. As your child grows, you like to be a buddy, but it's important not to blur the lines too much. You also don't want to give in to yelling all of the time. Always be enthusiastic and they'll follow your footsteps.

## **FRIEND & ENEMY:**

As a friend, you love spending time with them, and since you're always up for a good time, they love spending time with you. Your best friends can keep up with you, are positive people, and are always interesting so you don't get bored. Your only trouble is having more than a superficial friendship because you're hesitant to open up emotionally to anyone, but to have true friends, you have to do it.

As an enemy, you're actually a good one because you're not prone to holding grudges, so you don't keep coming after people and punish those who have wronged you. Once you let go and move on, there's no turning back for you. At the onset, in the heat of the moment, your anger gets the best of you and you'll go off on them. Once it's over, it's over, and you might even forget the whole thing even happened.

## **AS A PET:**

Your Aries pet is full of energy. They probably tire you out! They have to keep going and going and going, and just when you think they're going to exhaust themselves, they find more energy from somewhere. They need to be kept busy, so lying around the house or in a cage isn't too fun for them, and might make them even more rambunctious and hard to manage. Training them doesn't come easy! They seem to have a mind of their own, and are constantly on the go. They may have a hard time being around other pets, preferring to be on their own. They won't be bossed around or pushed around, and can stand up for themselves. There can be a fire energy to them, or even in their coloring. They know what they want, and you don't have to take too many guesses to figure it out. They're likely quite expressive for an animal. No matter how much they may seem to want to get away, they can still be affectionate and show you love!

## **When you're GOOD:**

You channel your energy into your work, your relationships, and your passions. You know when to pull back and when to jump, when to think about things first and when to listen to your heart, and when to put yourself first and when to put others first. You're a leader, a pioneer, and have an infectious positive attitude. You're confident, strong, and you're not afraid to take the first step.

## **When you're BAD:**

You're bouncing off of the walls all of the time. You can't sit still for two seconds. You drive everyone crazy with all of your energy, and you can't focus on anything. You have to have things your way, and don't care what other people want. You don't consider other people's needs, and are way too selfish. You're impatient, impulsive, cocky, and get yourself in trouble every chance you get.

## **GENERAL:**

Aries, you're the first sign in the zodiac, the astrological newborn. As the first sign, you don't have any of the baggage that the other signs carry, allowing you to approach everything in life with enthusiasm. You're attracted to anything new, and you're constantly pursuing things, always excited about whatever new trail you're blazing, and you bring your enthusiasm with you. Not jaded like the other signs can be, your positive outlook keeps you from getting stuck in any bad moods for very long. You love to smile, laugh, and enjoy yourself, and you value your independence. You don't want to rely on anyone else to get things done or make you happy. You're perfectly capable of doing that on your own, and you want to.

Once you decide to do something, you get to it quickly without much thought or planning, and since you really only like the adrenaline rush of the beginning, you get bored easily, becoming impatient when things don't happen the way you want right away, and you have trouble seeing things through. You're the type who starts a million projects but never

finishes any of them. If you could learn a little discipline, it would take you far.

You have plenty of energy to do whatever you want to do, so you don't have to worry about that, but if you don't have enough to do, you get restless, agitated, and prone to accidents, so it's important for you to be physically active and keep a busy schedule. Most others might suffer a total collapse from the kind of schedule you need, but they don't have the abundant energy that you have. Harness your energy so it's not all over the place with no direction. When it has something to focus on, you'll be able to do incredible things.

You're the pioneer of the zodiac, Aries, the one who can go where no one else has gone before, and you do so with a smile on your face and excitement in your soul that's hard to match, squash, or not be in awe of.

## TAURUS: April 20th - May 20th

SYMBOL: Bull

COLOR: Green

ELEMENT: Earth

QUALITY: Fixed

PLANETARY RULER: Venus

DAY: Friday

NATURE: Semi-fruitful

POLARITY: Feminine

DIRECTION: South by East

TAROT CARD: III Empress

Mars is in detriment (weak) in Taurus

The Moon is exalted (strong) in Taurus

Jupiter is strong in Taurus

## LOVE:

When it comes to love and relationships, you take commitment seriously. Once you do commit to someone, you're in it for the long haul, and you expect the same from your partner. The problem for you is getting to that point because you have a hard time opening up emotionally and letting yourself get close to people. You don't have any shortage of suitors, and don't have any problem sampling, but you won't let it go past the physical with just anyone. Emotional intimacy is something you'll only venture into with someone who seems worth it and is trustworthy. Trust is important for you, because if they betray you, you won't be able to move past it. Your dedication is 100%, and you'll be there for them. You won't be lacking in the passion department, and you'll bring your sensual nature into the mix. Someone who gives you lots of chocolates and can cook will always get your attention, and you need someone who has good taste and prefers the finer things in life. Because of this, you prefer someone who is at least financially stable, if not wealthy. You love to be showered with gifts, so you need to be careful because you can fall for a shady character just because they make you feel like royalty. Remember your morals and values, and find someone who shares the same morals and values as you. You find it difficult to be with someone who doesn't share the same beliefs as you, and you tend to date people who come from a similar background to you.

The signs that you're most compatible with tend to be the signs in the same element as yours, and that's Virgo and Capricorn. These two signs share your grounded energy and practicality. Virgo will bring some structure to your life, and Capricorn will give you the status that you'd like. Virgo will get you to take things more seriously, and Capricorn will get you on the right track. It's a good match with either of these signs. The sign that is opposite yours in the zodiac tends to be the one you have the most sparks with, and for you, that's Scorpio. You can't stand their emotional intensity or obsessive behavior, and wish they'd just relax, but you could use some more emotional intensity yourself, and they could learn to relax from you. You'd help one another with your weaknesses, making you stronger.

## **MONEY & CAREER:**

When it comes to money, you can save well when you want to, but when you want something luxurious, you have to have it and will spend. You're good at saving up for the things that you want, but need to work on having more restraint. You have expensive taste, no matter what your income bracket, and have a hard time enjoying your life if you're not financially secure because of that. You want to be able to shop whenever you feel like it.

When it comes to your profession, you don't care much for being the boss, and work well with someone else in charge. You do whatever work you're given, but you won't go the extra mile unless you want to

get something out of it, and probably look for shortcuts anywhere you can. You can be a passionate person, so ultimately, you need to do something that you're passionate about, otherwise you'll just work because you have to. Since you tend to be drawn to the arts, you could be an artist, musician, gallery owner, music manager, talent scout, or anything dealing with the arts in some way. With your love of food, many of you can be good chefs, bakers, or taste testers. Some other Taurus professions are: farmer, banker, investor, appraiser, singer, surveyor.

## **HEALTH:**

Taurus rules the neck and throat, so you may find that whenever you get sick, you usually get a sore throat, and have laryngitis often. If you talk too much, your voice just starts to disappear. You get a frog in your throat constantly. You can also have thyroid issues since your thyroid is in your neck, and you can have stiffness in your neck, tension of the muscles, and pain the neck. Since you do love food, your weight can be a problem and issues can stem from that.

## **CHILD & PARENT:**

As a child, you loved to color, listen to music, dance, and sneak as many cookies, candy bars, and chocolate as you could. You weren't too active though, and didn't have a ton of friends, so you may have seemed quiet or like a loner. You just didn't need all of the constant stimulation that other kids do. You weren't in a hurry, bouncing off of the walls, or

throwing temper tantrums. You liked watching television, taking naps, or making cookies with Mom.

As a parent, you're patient with your children, letting them get through things in their own time and learn in their own ways. You seem so stable and secure to your children, and act as their rock. If they turn out to be radically different from you, you have a hard time accepting that, but you shouldn't try to force them to be just like you. All that matters is that they're good people, so be open.

## FRIEND & ENEMY

As a friend, you're dedicated, loyal, and not going anywhere. You take your friendships seriously, and because of that, you don't have many close friends. The few that you do have, you'll remain close to for life, and they're usually people you met in childhood and have stayed close to. They also tend to come from the same background as you, and have had similar life experiences. Your only issue is that you don't usually let them in emotionally. Knock down the walls.

As an enemy, you don't let things go easily, so you'll hold a grudge for a long time, remembering what they did to you and reminding yourself of why you hate them. Once someone is on your bad side, it's difficult for them to get on your good side ever again. You won't be close with them again because you won't forget what they did.

## **AS A PET:**

Your Taurus pet likes to lounge around looking pretty. They don't care much for chasing anything, and would rather be entertained than do the entertaining. They likely love food and gobble up anything you give them, though they prefer the more expensive stuff, and you wonder how they even have more expensive taste. They like to have toys to play with that are theirs, and they won't share. They like being touched and petted, and may like the outdoors for the sights, smells, and sounds. Their senses are good, and they can react to strong odors and loud noises. Playing music for them can help calm them down. You'll need to exercise them routinely, otherwise they won't budge and have weight problems. If they really don't want to, it'll be hard for you to get them to. They can be incredibly stubborn once they've made up their mind. They may be hard to read at times, but they're incredibly loyal, and always by your side!

## **When you're GOOD:**

You know when the appropriate time to relax is, and you make the most of every second, knowing that you have work to do, and wanting to make sure you enjoy your time off. But when it's over, you get right to work, and you don't stop until you're done. You're persistent, focused, and sensual, in touch with your body, and with nature. Your sensuality gives you a different kind of intelligence.

## **When you're BAD:**

You're lazy as lazy can be, not wanting to do anything for yourself, let alone other people. You indulge to the max, eating everything in sight, hoarding everything for yourself, and buying as much useless things as you can. You don't watch your spending, you don't share, and you don't care what other people need. You're a slob, you're dirty, you're a big mess, and you're too stubborn to change.

## **GENERAL:**

Taurus, you are the second sign in the zodiac, and are a grounded sign. You feel as though you're one with the Earth, and detect the subtle shifts on the planet. Your connection to the Earth is what keeps you grounded, and make you the most sensual sign in the zodiac. When your senses are stimulated, you feel alive. You love good music, rich foods, perfume, sunsets, candy, and fuzzy blankets. You're drawn to the arts, especially music, and even if you don't have artistic ability, you certainly have an eye for it. Food makes you feel good, and some of you go too far with it, but you just love it so much that it's hard for you to stop yourself. Whenever you feel bad, it always makes you feel better.

It takes you a long time to make decisions, but once you do, you stick to it. If it's what you believe in, you can't be swayed - even if you're wrong. This makes you stubborn, the astrological bull, and you'll fight anyone who tries to push you. You like to lay back and relax, lounging poolside, sipping hot cocoa by a roaring fire, or cuddling with a teddy bear. You'd much rather spend your time relaxing than doing anything else. You're a

hard worker when you want to be, but you rarely go out of your way to work more than you need to.

You don't need to be busy and prefer a wide-open schedule where you

can laze the day, week, or month away. Other people think that you're

lazy, but you just don't see the point in rushing. Everything will still be

there tomorrow, and you want to enjoy the moment while it's here.

Because of your easy-breezy style, you can be late a lot, especially for

things that you don't really want to do. You do better when you have

someone else calling the shots because you don't care much about

being a leader. That's too much work. If you feel that it'll be good or

helpful for you or someone you care for, you'll put in the time, but for

the most part, all you want to do is relax, and no one does it better than

you!

## GEMINI: May 21st - June 20th

SYMBOL: The Twins

COLOR: Violet

ELEMENT: Air

QUALITY: Mutable

PLANETARY RULER: Mercury

DAY: Wednesday

NATURE: Barren

POLARITY: Masculine

DIRECTION: West by South

TAROT CARD: VI Lovers

Jupiter is in detriment (weak) in Gemini

Saturn is strong in Gemini

## LOVE:

Being as social as you are, you tend to meet a lot of potential suitors, and since you're so nice to be around, you have many to choose from. You're a sign that doesn't tie yourself down right away, and prefers to date a lot. A lot. You'll go through people quickly, getting bored with them and moving on. You need someone who you view as an intellectual equal and who can constantly stimulate your brain. If there's no mental connection, it's hard for you to remain interested. Someone you can have amazing conversations with, who has something to teach you, and who knows how to calm you down would be best for you. When you're young, you don't take dating very seriously, and it can take time before you decide to commit to someone. Your one problem is forming an emotional connection because you put so much focus on the mental one, but without an emotional one, the relationship eventually fizzles out. When you find someone you really like, work on building trust with them. Once you really trust them, you'll find it easier to open up your heart.

The signs that you're most compatible with tend to be the signs in the same element as yours, which are Libra and Aquarius. These two signs share your intellect, and you'll easily find a mental connection with them. Libra will help you become comfortable with commitment, and Aquarius will help you explore the world more in-depth. Libra will show you how to plan out what you want, and Aquarius will help you with the big picture. Being around them feels natural for you, and there's an

affinity with them that you won't find with anyone else. The sign that opposes yours in the zodiac is usually the one that you have the most sparks with, and for you, that's Sagittarius. Being opposite one another, you can find their energy overwhelming and their big personality overpowering, but you still find yourself drawn to them, and the passion is undeniable. They can help you to be more daring and warm, and they'll match you in intellect.

## **MONEY & CAREER:**

When it comes to money, you try to make plans for what to do with it, but have a hard time keeping to those plans because half the time, you forget them. You can be good with creating a budget, dealing with taxes, and general accounting (you can have a knack for numbers), but thinking about things like your long-term financial future can be too much for you to fathom. You like to get information first before you make financial decisions, and can get advice from the people around you. Make sure you're going to the people in your life who you trust most and are sound financially, otherwise you can fall prey to people who purposefully steer you down the wrong road. You don't need to spend a lot, but you don't feel the need to hoard your money either. If you can work on being better with the long-term stuff, you'd be good with your finances.

When it comes to your profession, you do best when you're not the boss, you're not overseeing anyone, and you don't have to put the

pieces together. You're excellent at collecting information and data, and can be a good statistician or accountant. Since you can have a way with words, some of you can make good writers, editors, publishers, or literary agents. No matter what job you have, it needs to be something that keeps you mentally stimulated and where there is constant change so you don't get bored, but isn't too stressful so you don't have anxiety from it. Dealing with technology can also be good for your sign, and many of you can work in IT. Some of you may go from job to job looking for what you want, or stay with one job you hate just to avoid the stress of job-hunting. Some Gemini professions are: salesperson, coordinator, publicist, advertiser, producer, linguist.

## **HEALTH:**

Gemini rules the hands, wrists, and arms, so injuries tend to be sustained there, and you can suffer from things like carpal tunnel or repetitive stress syndrome. Gemini also rules your lungs, so you have to watch out for breathing problems, constantly getting hay fever, bronchitis, or pneumonia, as well as having asthma or allergies. Being so sensitive to stress, you can also stress yourself sick, and have stress-related illness, so it's important for you to learn how to deal with stress in a healthy way.

## **CHILD & PARENT:**

As a child, you were always curious about everything, constantly wanting things to be explained to you. Most of you liked school simply because you liked to learn, though even if you hated school, you were a

good learner. You had lots of friends, were always spending time with them, and kept a busy calendar, involved in lots of different activities. You were sweet and honest, and wanted everyone to laugh with you.

As a parent, you share a lot with your children, wanting them to love to learn and be as curious about the world as you are. You like to talk to them and have an open dialogue with them. Them being able to talk to you is the most important thing to you. You try to stay as involved in their activities as you can, and encourage them to join whatever they want to stay busy.

## **FRIEND & ENEMY:**

As a friend, you love to talk with them about anything and everything. You're always up for whatever news they have to share, and whenever something happens to you, you can't wait to share it with them. You know everything there is to know about everyone, including the juicy stuff, though it may be hard for you to keep that information to yourself. You love to go to parties with your friends and plan events. They help you feel young and spunky.

As an enemy, well, you don't have many enemies! You tend to make friends with everyone, not wanting to get involved in any drama that people want to stir up, and your friendly demeanor wins over most people. Even the ones who don't like you rarely hate you. When someone does wrong you, with your short memory, you forgive and

forget more quickly than most of us. That could be to your detriment through, because some people don't deserve that, so you have to be more discerning in who you forgive.

## **AS A PET:**

Your Gemini pet is probably always yapping, meowing, mooing, barking. Sometimes, you swear you can hear them actually speak words. They're active with a lot of energy, and they can learn quickly but may forget just as quickly, so you're constantly reminding them of how to do things. They're sociable animals and don't mind being around others of their species or out-of-species. In fact, it might be good for them to have other animals around, and they can do well if you have other pets. They need constant stimulation, so other animals around for companionship can help them with that. Children are good for them as well with their abundant energy and enthusiasm. They don't seem to get upset very much, and seem happy all of the time, though when they do get angry, they can snap quickly, but get over it quickly. They can't sit or lie still to save their lives! And they don't usually stick with one activity for very long. They're always looking around and taking in new information, and have anxious energy.

## **When you're GOOD:**

You know that thinking things through is a good thing, but doesn't mean anything if you don't walk the walk and talk the talk. You know when to reel your mind in, and you know how to calm down your nerves so you

don't get overwhelmed. You stick with your ideas long enough to flesh them out, and don't avoid something just because it's hard. You can think of ways to make it easier.

### **When you're BAD:**

You overthink things to the nth degree, and don't know when to stop your yammering. The more you think, the more fidgety you get, your anxiety shooting through the roof, and you just get worse and worse. You become scattered and unfocused, can't remember your own name, and jump from one thing to the next. You'd rather just abandon ship and find another way than stick with it.

### **GENERAL:**

Gemini, you're the third sign in the zodiac, and the first of the intellectual air signs. Your mind is sharp and quick, and you process everything in life through your mind. You don't like to take things too seriously, and prefer to take a more light-hearted approach, so your curiosity is like that of a child instead of being intense. You're eager to learn new things and can absorb new information quickly and easily. Your only problem is that you tend to get bored early and move on fast, so you have a hard time mastering things that take a long time to learn. If they can hold you're interest though, you'll stick with it.

Since you do get bored easily and are always looking for something new to wrap your brain around, you can be a little scatterbrained. You

take in so much intellectually that it's hard to keep track of everything, and you forget a lot. You also have a hard time with the big picture because you're better with the small details. You can gather lots of information one piece at a time, but stepping back and seeing them as a whole can baffle you. You're better with daily tasks and small projects, so if you're dealing with a larger project, you'd do well to break it down into smaller ones.

With everything you take in, and the fact that you process everything intellectually, you can be prone to nerves and anxiety. You need to learn how to get better in touch with your emotions, and get out of your head every so often. Connecting with other people is good since you're a highly social sign, always wanting to be around people for the intellectual stimulation they give you. You love to talk, and maybe gossip too, and you keep a large circle around you to keep you occupied and give you plenty of people to chat with. You like to have fun and you love to laugh, and can have a good sense of humor. You're a wonderful person to be around!

## CANCER: June 21st - July 22nd

SYMBOL: Crab

COLOR: Silver

ELEMENT: Water

QUALITY: Cardinal

PLANETARY RULER: Moon

DAY: Monday

NATURE: Fruitful

POLARITY: Feminine

DIRECTION: North

TAROT CARD: VII Chariot

Saturn is in detriment (weak) in Cancer

Jupiter is exalted (strong) in Cancer

Mars is in fall (weak) in Cancer

Mercury is strong in Cancer

## LOVE:

In love, you can be sentimental, and you love some romance, but the traditional kind. Red roses, boxes of chocolate, nice dinners, that sort of thing. Anything too out there won't be comfortable for you. You can be a little moody when your partner upsets you, and you tend to retreat when you feel hurt instead of facing the issue, so you need someone who won't stand for that and will make you deal with things instead of letting you run away. They need to support you and make you feel safe, and you'll return the favor, supporting them in anything they do, always by their side. They need to want a comfortable home and understand how important that is for you. If they create a lot of drama at home, you won't have it. You can be a little clingy sometimes, so it's important for you to have your own life and not look to be fulfilled by someone else. When it comes to dating, you're not up for dating a ton of people or having a lot of flings. You want to be with someone that you have a real connection with. You just have to make sure you don't fall for every person who pretends to be your perfect partner.

The signs that you tend to be most compatible with are the ones in the same element as yours, which are Scorpio and Pisces. These two signs understand your emotional nature, being emotional water signs themselves, and they'll offer you the deep emotional connection that you're looking for. Neither will make you feel uncomfortable or push you to do anything you don't want. Scorpio will help you focus, and Pisces will help you be more compassionate. Scorpio will show loyalty,

and Pisces will be understanding. The sign that opposes yours tends to be the one you have the most sparks with, and for you, that's Capricorn. They're so career-oriented that you don't feel like a priority and their emotional detachment can be off-putting, but the chemistry is there, and you can help them to show the depth of their emotion while they can give you the comfortable life that you crave.

## **MONEY & CAREER:**

When it comes to money, you like to hold on as much as you can. Because you crave so much security in your life, you understand that financial security is important, and you'll try to be good savers and investors. You always want to be comfortable, and part of that means having plenty of money. Some of you may take it too far and be overly frugal or downright cheap. Spending a little more won't put you in the poorhouse, so don't be such a penny-pincher when you shouldn't be, and think about using your money for good purposes to help people. People tend to be surprised by how much money you have when they find out because you live well below your means and you stay quiet about the subject when it comes up. You don't feel the need to brag about it.

When it comes to your profession, you have no problem working hard and dedicating yourself to your job. Many of you will find an employer and stick with them for decades. You don't like the upheaval of job switching so you stay right where you are. Your perfect job would likely

be something you could do at home, or by dealing with homes in some way, like home building or interior design. You can also do well taking care of other people since you're so sensitive, and can be in a job that cares for children, the elderly, or pets. Some other professions for Cancer are: executive, gardener, teacher, social worker, soldier, librarian.

## **HEALTH:**

Cancer rules the stomach, so you have to watch out for getting stomach ulcers or tumors, having frequent stomach aches, indigestion, gas, or other stomach-related digestive problems. This is especially the case when you become upset, and many of you may find that whenever you do, your stomach starts hurting or you get nausea out of the blue. Cancer also rules the chest/breasts, which can mean breast cancer, cysts in the breasts, or some other breast issue. Your pancreas is also ruled by Cancer.

## **CHILD & PARENT:**

As a child, you were quite sensitive, and you played alone in your room a lot. You seemed older than the other kids, and didn't quite act your own age. You preferred to spend time at home with your family, cooking with Mom, or spending time with your grandparents. You likely had an active imagination, and could spend hours lost in fantasy novels or movies. You needed a lot of support from your family, especially your parents, and required a lot of affection.

As a parent, you're very nurturing, and you try to support your child in whatever they do. You want them to always feel loved and cared for, and to never feel like they have to go through anything alone. You want them to know they can count on you. You work hard to provide a stable home for them, and an environment where they can relax and be themselves.

## **FRIEND & ENEMY:**

As a friend, you don't make many of them, but the few that you do have, you cherish. You keep your friendships for many years, and your real friends aren't just your friends. They're your family. You'll help them out in whatever ways they need and be there for them to offer support and comfort when they're dealing with problems. Just don't try to mother them, because you have a tendency to do that with everyone you care for, no matter how old they are.

As an enemy, you have a long memory, one of the longest of all of the signs, and you won't forget what someone did to you, ever. It's hard for you to forgive, and you'll certainly never forget. You won't go after someone, trying to attack them or seek vengeance to make them pay for what they did to you, and instead have passive-aggressive tendencies. This keeps you from moving on because you don't confront them the way that you want to, so the hurt and anger simmers for a long time.

## AS A PET:

Your Cancer pet loves to spend time with you, their parent, or their actual parent if they're still around. They want you around all of the time, and have a hard time parting with you. They want to curl up with you, lie in your lap, and need to be around you. They probably wander into the kitchen and like it when you cook. They can instinctively understand your emotions, and pick up on the slightest changes in your mood. They only want to make you feel better, but if you yell at them, they'll stay far away from you, too hurt to be around you. They may have a hard time eating when they're upset. They bond well with the people and animals that they're always around, and prefer being in familiar places, not liking any new stimuli, people, or environments. They can make excellent assistance animals, always wanting to help out. You have to make them be active and play with them, otherwise they may gain a lot of weight. If you can, take them swimming or near water because they may find that enjoyable.

## When you're GOOD:

You understand your feelings on a deeper level, and have a strong internal foundation so you don't need to look toward others for assurance. You've built up more confidence and know how to nurture yourself. You're a mother hen with others, giving comfort and support to those who need it without expecting anything in return. You confront issues directly and work them out.

## **When you're BAD:**

You can't see the forest from the trees. You're impacted so personally by everything that happens, regardless of whether or not it has anything to do with you. You're so wrapped up in your own problems that you ignore everyone else's. You need constant comfort and to be nurtured 24-7, and only want to be told wonderful things or you'll pout like a big baby and make little jabs.

## **GENERAL:**

Cancer, you are the fourth sign in the zodiac, and are a sensitive and emotional sign. You feel everything deeply, and are easily wounded as a result. When you get wounded, you hide in your shell, not wanting anyone to have the chance to hurt you again. You need to work on developing thicker skin so you don't keep yourself locked away from people so much. Opening up emotionally would be good for you because it'll help you have more closer relationships with people that will support you, and you need plenty of support if you're going to feel safe in this dangerous world.

You like to be comfortable, which tends to make your home your most favorite place on Earth. You'll make it a cozy, inviting place that everyone loves, and it's a good place for you to relax. Because you can relax at home, you tend to come across differently there, more like your true self, so if you come across as loud and flashy, you'll be quiet and shy at home, and vice versa.

At times, you can be quite ambitious, whether it's with your work or your personal life, and you want to have some success in your life to create stability. You're not someone who goes against tradition, and you prefer to go with conventional methods. Being daring or adventurous usually isn't something you strive for, and you don't understand why people can't be happy with the way things have always been. It could be good for you to open up your mind though.

You tend to experience life through your emotions, and you neglect your mind and body to a degree. If you want to gain more control over your emotions, you should try to form stronger connections to your mind and body. If you can do that, there wouldn't be much that you couldn't do, and you'd always feel secure, safe, and comfortable, no matter where you are.

## LEO: July 23rd - August 22nd

SYMBOL: Lion

COLOR: Gold

ELEMENT: Fire

QUALITY: Fixed

PLANETARY RULER: Sun

DAY: Sunday

NATURE: Barren

POLARITY: Masculine

DIRECTION: East by North

TAROT CARD: IX Sun

Saturn is in detriment (weak) in Leo

Mars is strong in Leo

## LOVE:

Since you're so charming, you attract many suitors, and you love to feel wanted, so you'll date many people, not tying yourself down for some time. In your younger years, you don't take dating too seriously, but once you do find someone that you care for, you have no problem committing yourself. You're incredibly loyal, and you expect the same from your partner. Infidelity wounds you so deep that it's hard to ever recover. You need to know that you can trust your partner completely. When you fall in love, you fall hard, and you give your heart entirely. You need someone who is romantic in a grand way, can calm you down when you get riled up, and is a decent person. Often, you may be attracted to someone because they seem flashy, but you should try to resist that. They may be able to give you lots of jewelry, but they'll break your heart, and are nice gifts worth that kind of pain? Someone far less flashy than you think will likely be the one for you.

The signs that you tend to be the most compatible with are the ones in your own element, which are Aries and Sagittarius. These two signs have as much energy as you do and are just as outgoing, so you'll always have someone by your side. Aries will get you to be more pioneering, and Sagittarius will show you the world. Aries will make you be more physically active, and Sagittarius will exercise your mind. Both of these signs share your positive outlook, humor, and love of living in the moment and having a good time. The sign that is opposite yours in the zodiac tends to be the one you have the most sparks with, and for

you, that's Aquarius. They seem odd, aloof, and way too wacky for your taste, but you still feel drawn to them, and you can show them how to live more in their body and get out of their head, while they can teach you to think more about the future, and you can come together in your passion for helping others.

## **MONEY & CAREER:**

When it comes to money, you can have a hard time keeping it. You want the finer things in life, and that costs money. When you surround yourself with rich things, you need to actually be rich to not bankrupt yourself. You're likely always scraping money together for necessities, and splurging on extravagant items that you don't really need. You can charm many people into giving you money, and may take on a sugar daddy/mommy to pay the bills and take care of you, but you'd be better off learning how to do this for yourself. You'd be amazed at how much it would help your confidence, and eventually, you can have those nice things without spending yourself into oblivion. You also like to give your money away to those who need help, and while you shouldn't give away money that you don't have, usually, the more generous you are, the more you attract money to you.

When it comes to your profession, you want a job that allows you to be in the spotlight and get attention for your work. If you're somewhere where they never recognize all of the work that you do, you'll be miserable. Some of you may want to be recognized not only by your

boss, but by peers in your profession, or even by the public. Given how theatrical you are, working as an actor or in the theater is a natural inclination. With your energy, you can also be an athlete. When you find a job that you love, you'll dedicate yourself to it, and do the work necessary as long as you don't buy into your own hype and think you're more important than you are. Some other Leo professions are: artist, director, cardiologist, politician, publicist, news anchor.

## **HEALTH:**

The back falls under Leo rulership, so you can suffer from back aches, issues with the spine, scoliosis, and need to be mindful of your posture. Leo rules the heart, and you really want to stay on top of your heart health to avoid heart disease and heart attacks. Make sure you exercise regularly and eat well. Having a healthy lifestyle goes a long way for you. Managing stress is also crucial since stress can have such a negative impact on your heart health.

## **CHILD & PARENT:**

As a child, you had plenty of friends, you were involved in many activities where you could be the star, and you were always cracking jokes and making people feel better. You had no problem sharing your toys and thought of those less fortunate than you. You probably weren't very good with your chores though, and tried to get out of doing them as much as possible by charming your parents out of them or getting someone else to do them for you.

As a parent, you're nurturing and warm, helping your children with anything. You want to give them as much as you can, and give them lots of attention and affection. You have a prominent inner child, and you let it come out when you're around them so you can have lots of fun together. You adore your children and want them to feel loved.

## **FRIEND & ENEMY:**

As a friend, you tend to have many of them in a casual sense, but not as many that are true friendships. It can take time for you to open up emotionally, and you need to build trust first. Once someone is your friend, they're your friend for life, and you'll help them out with whatever they need. You're always up for a good time, have plenty of laughs to share, and want them to feel good.

As an enemy, you can be ferocious. You are ruled by the Lion, after all, and your wrath can be incredible. When someone wrongs you, you don't want to let them get away with it. You may try to find ways to get back at them and make them pay. Your anger and hatred for them lasts a long time. It can be evident just in the way that you look at them, with glaring red in your eyes. It's because you wound so easily, and you won't forget it.

## **AS A PET:**

Your Leo pet struts around like they're the master and you're their pet. They love to be treated like kings and queens, pampered and given special treatment, given the best toys and nicest gifts, and eating the most expensive food. They love to be groomed and seem like they know just how good they look. They have confidence, but they need a good amount of affection, attention, and praise. They're not much for work, but they respond well to positive reinforcement. They love spending time with you, and while they may seem lazy, they're quite protective. They like being around other people and animals, and other animals show them respect and look up to them because of their regal demeanor. They prefer warmth and sunshine and like to be outside, but only to lounge, not to get dirty. A sun room would suit them well because they like the light and the heat without the dirt. They have quite the personality, and they show you plenty of love and affection.

### **When you're GOOD:**

You have an enthusiastic nature, find life to be exciting and enchanting, and have an appropriate response to situations, not going overboard. You like attention, but won't take it away from other more deserving people, and can give as much attention as you get. You're a generous person, and you want to share the love and happiness in your life.

### **When you're BAD:**

You're the epitome of a drama queen, going into hysterics over tiny things and acting like everything is the biggest deal when it means

nothing. You want the spotlight on you at all times, and don't care about other people. You only look at your own wants and needs, and disregard the wants and needs of your loved ones. You put yourself first, and no one else makes the list. And you suffer the sin of pride.

## **GENERAL:**

Leo, you are the fifth sign in the zodiac, and are a warm and outgoing fire sign. You have plenty of energy to burn, and you want to use it being around other people, being sociable, having fun, and getting attention. You need attention more than most, and you always want to be center stage. Leo is known for being dramatic and theatrical, and it's partly because you want attention, and being that way is an easy way to get it, though it can create some unnecessary problems for you. Getting attention helps you to feel secure because deep down, you're a softie. Your heart is big and sensitive, and you can get hurt easily, but you don't want to face that so you put on a theatrical display. It's okay to admit when you're hurt, Leo, and you should work harder at trying to deal with your emotions.

You're very friendly and have a great sense of humor, and while some of you can seem selfish, you can actually be quite generous. It hurts you when you see people hurting, and you'll do whatever you can to help them. Your great, big heart just won't let you walk away without doing something.

You can have a hard time adjusting to new changes in your life, and prefer things to stay as they are. You can get stuck in situations and have a hard time getting out, so when you find yourself in a bad situation, you're usually stuck there for a while. It can take time for you to learn from your mistakes.

You want your life to be similar to that of royalty, and you crave extravagance. All of the finer things in life, you have to have them, and you have to have them right now. When you're surrounded by rich luxury like that, it makes you feel important, and boosts your self-esteem and confidence, and you hope that it impresses other people. How people view you is important to you, and you want to come across as an impressive person. Don't worry about what people think of you, and know that you're a good person with a good heart.

## VIRGO: August 23rd - September 22nd

SYMBOL: The Virgin

COLOR: Indigo

ELEMENT: Earth

QUALITY: Mutable

PLANETARY RULER: Mercury

DAY: Wednesday

NATURE: Barren

POLARITY: Feminine

DIRECTION: South by West

TAROT CARD: IX Hermit

Jupiter is in detriment (weak) in Virgo

Mercury is exalted (strong) in Virgo

Venus is in fall (weak) in Virgo

Saturn is strong in Virgo

## LOVE:

You're not the type who dates a whole lot or sees dating as a game to be played. You usually only date someone once you've already gotten to know them, and you take your time during that process. It takes a very long time for you to open up emotionally, and you have to make sure that you can trust the person first. At times, you can seem shy, reserved, even innocent, even though you may actually be far from that underneath (Virgo does rule the sexual extremes, after all). Once you commit to someone, you're incredibly loyal and supportive. Secretly, you can be quite affectionate. You need someone who is stable so you don't have to worry, can soothe your nerves when you get carried away, and who can open you up so you don't remain in your closed world.

The signs that you're most compatible with tend to be the ones that are in the same element as yours, which are Taurus and Capricorn. Both of these signs share your practicality. Taurus will show you how to relax, while Capricorn will make you feel secure. Taurus brings some indulgence into your life, and Capricorn brings some ambition. You feel comfortable with either of these signs, and it doesn't take much effort. The zodiac sign that opposes yours tends to be the one you have the most sparks with, and for you, that's Pisces. Their emotional nature is puzzling to you, their sensitivity is hard to understand, and their love of fantasy is polar opposite to you, but there's a connection anyway, and you can teach them to be more grounded in reality, while they can teach you to use your imagination more.

## MONEY & CAREER:

When it comes to money, you're a saver, not a spender. Being as practical as you are, you don't understand splurging on items that you don't need, and would much rather put that money away for a rainy day. Being so risk-averse, you usually don't go for high-risk investments though, and may find stocks to be too dicey, so you tend to prefer options that are more stable and have been around for a long time. Some of you can be downright cheap, but it's usually only with yourself. When it comes to gifts, you'll spend a little, though it's usually on something practical that you know they need. You tend to make a budget and stick to it like a hawk, making sure you know where every penny is coming from and going to. You don't have to worry about spending money that you shouldn't.

As for your profession, since you're good with data and tend to be good with numbers, you can work as a mathematician, statistician, economist, or accountant. You usually don't make a good boss because you don't like to be in charge, and do best when you're given work to do and can go off and do it on your own. You don't like to mingle with coworkers, gossiping, seeing it as a waste of time that could be better spent getting more work done. Being so good with editing, you'd make a great editor. Some Virgo professions are: critic, librarian, psychologist, secretary, analyst, psychologist.

## **HEALTH:**

Virgo rules your bowels and intestines, so you can be prone to constipation and diarrhea, especially when you're stressed out. Your whole digestive system can get thrown out of whack when you're stressed. For you more than any other sign, stress manifests physically. It's of the utmost importance that you don't ignore your stress and find ways to cope. You'll have all sorts of health problems if you don't.

## **CHILD & PARENT:**

As a child, you were shy and quiet, and played by yourself a lot. You had a hard time making friends because you didn't like to approach people, and you rarely made a scene anywhere. Your teachers likely loved you because you did all of your work on time, you caused no disruptions, and did well with your work. You were honest with your parents, having a hard time lying, which they loved but you probably didn't.

As a parent, you expect a lot of your children, and want them to be the best that they can be. You'll support them in their ventures and help them in whatever ways you can. You try to have a home life that's stable and secure for them, and you try to be honest with them as much as you can.

## **FRIEND & ENEMY:**

As a friend, you don't have many of them, not seeing any practical reasons why you would need a large circle of friends. Since it's so hard

for you to open up to people, it's hard for you to make real friends, and often, you'll just have people in your life that you see at work, live in your community, or are friends of relatives, and not actual friends of yours. The few friends you do make, you keep for a long time. You just need to open up more.

As an enemy, you're an easy one to have. First of all, you don't make many, not seeing the point in holding a grudge. That's not practical, wastes your time, and takes you away from important work. You won't forget what they did, but you won't do anything about it either. You'll just leave the room if you ever see them in it, and mutter under your breath as you walk away, avoiding any confrontation.

## **AS A PET:**

Your Virgo pet is as helpful as a pet can be. They want to be of service, and will do as much as they can to help you. They can take care of you or the other animals in the house, especially when you or they are ill. They're great with kids, and will watch over them like a parent. They can sense when something bad could happen, and will try to stop it. They're quite tidy for an animal, and they don't like to make a mess, and don't feel comfortable in messy environments. Make sure the space that they're in the most is always clean. They like being around the people that they're comfortable with, but not fond of strangers. They're extremely smart and can learn very quickly. This makes them easy to train, and the fact that they want to please you helps. They can get

grumpy at times though, and can find little things annoying. They need to stay busy to keep their nerves from cropping up and keep their mood more light.

### **When you're GOOD:**

You're a hard worker, productive and efficient with your time and resources, but know when to pull back so you don't go too far. You consider other methods might be just as effective as your own, and are open to ideas. You understand that you and everyone else is flawed, and you accept those flaws. You see the details, but you don't get lost in them, knowing that the big picture matters.

### **When you're BAD:**

Everything has to be done perfectly, or you freak out. Really, everything has to be done *your* way, or you freak out. You think that your way is the only right way, and even when other people do it your way, you still think it's wrong. You're a control freak, but you hide it as perfectionism. You can't stand disorder, and want everything to be in its place or you'll lose sleep over it. You freak out over small details.

### **GENERAL:**

Virgo, you are the sixth sign in the zodiac, and are the most practical of them all. You don't look at the world in a whimsical, light-hearted way. You take an analytical approach to life, you collect the data necessary for each situation, and you make decisions accordingly. This allows you

to be an excellent worker, and you can get more done in a shorter period of time than most, and you do the job well. Being a perfectionist, you edit your work carefully, making sure there isn't one tiny piece there that shouldn't be. You hold yourself and others to a high standard, and while it's good to strive to be better, it can go to far. No one is perfect, no matter how much they try, including you, so don't be so hard on yourself or others about it. Accept your flaws and work with them.

When it comes to work, you have no trouble working hard, putting in the hours, and doing many tasks quickly, but you're better with the little things, the small details, and the minor tasks than with the bigger picture. By constantly collecting so much data, it becomes nearly impossible for you to put them all together cohesively. Don't get so lost in the data that you can't see the entire picture.

You're rooted in the Earth, and you see things how they are, though sometimes, it can lead you to be pessimistic. Life is rough, and there's no getting around that, but it doesn't always have to be. With how hard you work, you can turn things around better than you think. By looking at life the way that you do, it leads to bouts of anxiety because it's hard for you to be positive, and you can overwhelm yourself with all of the information you take in, work you take on, and perfectionist tendencies. You need to find constructive outlets for your feelings and not just ignore them all of the time. You view feelings as messy and something

to be avoided at all costs, but it doesn't do you any good. Embrace your emotional self, and you'll be the whole person that you should be.

## LIBRA: September 23rd- October 22nd

SYMBOL: The Scales

COLOR: Blue-green

ELEMENT: Air

QUALITY: Cardinal

PLANETARY RULER: Venus

DAY: Friday

NATURE: Semi-fruitful

POLARITY: Masculine

DIRECTION: West

TAROT CARD: XI Justice

Mars is in detriment (weak) in Libra

The Sun is in fall (weak) in Libra

Saturn is exalted (strong) in Libra

Jupiter is strong in Libra

## LOVE:

Being the sign that rules commitment, you have no qualms about this issue. When you find someone you really care for, you'll commit fully to them. It can take some time to get there though, not because you don't take dating seriously, but because you can't make up your mind. Since you present yourself so well, you usually have plenty to choose from, but you don't know how to make decisions well, so it can take time before you pick that one person you want to be with. The perfect person for you is someone who has similar interests, knows how to behave with others, treats you with respect, and considers you an equal partner in the relationship. You tend to be attracted to people based on their looks and the way they come across, but looks can be deceiving. It's hard for you to connect with people emotionally, preferring to have a cool exterior, but that won't give you the kind of committed relationship that you're looking for. You don't like things to get messy, but it has to happen in a relationship in order to build strong bonds that will hold you together.

The signs that you tend to be most compatible with are the ones that are in the same element as yours, which are Gemini and Aquarius. Gemini will bring laughter, and Aquarius will expand your world. Gemini will help you with your daily life, and Aquarius will help you think big. Both will connect with you mentally, have plenty of mutual friends, and feel like you've known them forever, even if it's only been a day. They're easy signs for you to be with. The sign opposing yours in the zodiac

tends to be the one you have the most sparks with, and for you, that's Aries. Their impulsivity gets on your nerves, their constant energy is exhausting, and you feel like you have to discipline them, but they can help you learn to let go sometimes, loosen up, and take charge, and passion will always be there.

## **MONEY & CAREER:**

When it comes to money, you tend to plan well and think about things for a while before you buy anything. You create a plan for a budget and you try to stick with it, but you may buy things that are designer simply because they're designer. You wear and buy the best because you think they're the best quality and you want to look the best, and you feel they'll have a lot of use value. You won't only splurge on yourself though, and have no problem buying your friends and family nice gifts. You want to look good in every way, but that can lead to bad spending. Don't have too many credit cards and know that you're so stylish, you don't need to buy the most expensive clothes to look good.

When it comes to your profession, you're usually drawn to something artistic, and many of you can be artists, musicians, fashion designers, or interior decorators. Being so compromising, you can be a mediator. Since you're concerned with what's fair, you can make a good judge. Many of you work better with a partner, no matter what profession you're in. You need your work environment to be calm and harmonious, otherwise you'll feel unbalanced and out of sorts, which keeps you from

doing your best work. You can play mediator between coworkers and be the one everyone goes to when they want fights solved, but it'll get to you after a while. You'd prefer not to work by yourself though, liking company, but any partner you have would need to be an equal partner, and not try to boss you around. Some other Libra professions are: actor, jeweler, diplomat, florist, makeup artist, lawyer.

## **HEALTH:**

Libra rules your kidneys, so watch for problems like kidney stones or diabetes. Stay on top of your blood sugar whether you have a family history of diabetes or not. Most importantly, find a way to manage your stress levels when you're in an unhealthy environment. If your life is drastically out of balance, it'll impact you physically, manifesting in all sorts of pain and making it easy for you to get sick. If you get a cold that you can't shake, take a look at your life and see what could be the source of the problem.

## **CHILD & PARENT:**

As a child, you were highly sociable, using your charm to easily make friends. You were friends with many different kids, and tried to treat everyone as equal to you. It aggravated you when adults would treat you like a child and not an equal, but you were always good-mannered, especially in public, and even when you voiced your displeasure, you rarely did it screaming.

As a parent, you work hard to create a harmonious home life for your kids, especially if you didn't have that as a child. You encourage them to be well-rounded and to give equal attention to all areas of their lives. You treat them with respect and not like idiot kids, and you try to be fair with them as much as you can (especially if you have more than one child). You instill in them a sense that everyone should be treated equally, and you'll fight for them hard if anyone mistreats them.

## **FRIEND & ENEMY:**

As a friend, you try to give the same amount of time to all of your friendships so no one feels neglected or left out. Despite having many friends and a large social circle, you know how to divide up your time and make them feel as though you really do care. You can have trouble connecting emotionally though, so it can be difficult for you to have any friendships that are beyond the superficial.

As an enemy, you don't have a short memory, but you don't have a long one either. You think people should be punished for what they've done, but not excessively, and you don't want to be the one doing the punishing. You don't want that kind of drama, and you'd rather work on forgiving them so you can move on.

## **AS A PET:**

Your Libra pet doesn't like to be alone, and prefers having someone with them all of the time. When they don't feel they're getting enough

attention, they may act out in some way, like by breaking something. They demand a lot of attention though, so it can be hard for you to meet their needs. They want to spend a lot of time by your side, but they would benefit from having another animal companion as well, someone they can do everything with when you're not around to be with them. They get along well with humans and other animals, always wanting to keep the peace and will settle fights quickly. They carry themselves with grace and are charming animals, and they like socializing. They like to be groomed because they want to be as pretty as possible. They usually are better looking than most other animals of their species and breed. They take things in stride and don't want any disruption, only wanting to make you happy.

### **When you're GOOD:**

You appreciate good manners and people who present themselves well, but know that there's more that lies beneath, and want to get below the surface. You believe in looking your best, but don't demand you look like a model every second. You can show the world who you really are, and aren't afraid of being a certain way. You care deeply for your loved ones and partners.

### **When you're BAD:**

You're a superficial person who doesn't care to look below the surface of anything. You only care about carrying yourself a certain way in public, looking and acting a certain way, and putting on a facade. People

don't know who the real you is behind the many masks you wear. You care more about designer clothing than people, and are a cold person, detached from your emotions.

## **GENERAL:**

Libra, you're the seventh sign in the zodiac, and are an intellectual sign concerned with fairness, equality, and justice. You want everyone in the world to be treated fairly, with dignity and respect, and to have equal rights and protections. No one is beneath you, and you wish everyone felt the same way. You hate to see all of the fighting and destruction in the world, and want everyone to just get along. You crave harmony, and will any compromise to get it. Sometimes, this makes you compromise too much, and you make sacrifices you shouldn't make or keep quiet about things you shouldn't for the sake of keeping the peace.

Balance in your life is one of your main goals, and you do your best to achieve balance in all areas of your life. You try to divide time equally between work and play, friends and family, me time and we time. It's a constant struggle, and one you'll never really win, but you keep trying anyway.

You tend to be horribly indecisive, vacillating over any and all choices you have to make, and you prefer to leave decisions up to others. You need to stop worrying about pleasing everyone and just go with what you want, but you care too much for others not to take them into

consideration. Your loved ones are important to you, and you take your close relationships seriously. You care about all of them and try to tend to each with care. Your loved ones don't have to doubt your commitment to them because it's apparent in how much you work at the relationship. Your only problem is you tend to be a relationship perfectionist, always seeing the flaws and never happy with less than perfect, and it can be too much. No relationship can be perfect, but that doesn't mean it's not perfect for you.

Being with loved ones is wonderful for you, and with your charming, graceful, and polite nature, they can't get enough of you. You carry yourself well with others, always knowing exactly how to act in public, and knowing just what to say to someone. Who wouldn't want to be around you?

## SCORPIO: October 23rd - November 21st

SYMBOL: Scorpion

COLOR: Black

ELEMENT: Water

QUALITY: Fixed

PLANETARY RULER: Pluto, Mars

DAY: Tuesday

NATURE: Fruitful

POLARITY: Feminine

DIRECTION: North by East

TAROT CARD: XIII Death

Venus is in detriment (weak) in Scorpio

Moon is in fall (weak) in Scorpio

The Sun is strong in Scorpio

## LOVE:

As a magnetic sign, you attract many people to you with your intense stare. Some of you ooze sexuality, while others are a little more awkward, but even the awkward can come across as sexy. You keep people at a distance, always seeming mysterious, and people love puzzles to solve. Each of them want to be the one to figure you out, but you won't let many of them try. You're terrified of getting hurt, and you don't let people in easily. You need someone who you trust completely, who is a strong person, and who can get you to let loose sometimes. Once you commit to someone, you're fiercely loyal, almost obsessively so. You can be prone to jealousy, even when it's not called for. You're always worried they're going to leave you, which is rooted in a deeply held belief that you're not worthy of anyone good. Let go of that, and you'll have an easier time in your relationship.

The signs that you're most compatible with tend to be the ones that are in the same element as yours, which are Cancer and Pisces. Both of these signs understand what it's like to feel deeply, be hypersensitive, and will tread carefully with your heart. Cancer will give you a loving home, and Pisces will help you become more compassionate. Cancer will support you completely, and Pisces will be sweet and romantic. You find these two signs to be easy to get along with. The sign that opposes yours tends to be the one that you have the most sparks with, and for you, that's Taurus. Their lackadaisical attitude irks you and their emotional calm is maddening, but their sensuality and your sexuality

merge together well, and they can teach you to take a break sometimes while you can teach them to connect with their emotions.

## **MONEY & CAREER:**

When it comes to money, you can be an excellent investor. You do your research into whatever interests you, and you determine what you want to do. Many of you can do well with stocks, or will find other ways to invest your money. You want it to work for you, though you don't mind working for it either. You tend to keep your money for yourself, and could learn to share more, especially with charitable ventures. Money won't keep you warm at night, and you can't take it with you when you're dead, so there's no use hoarding it like a miser.

When it comes to your profession, you're a hard worker, but not that great when it comes to working with other people or obeying your boss. You tend to do best in jobs where you're on your own, and many of you can be good entrepreneurs working for yourself. With your work ethic and obsessive personality, you can put in the hours needed to be successful. With your interest in the darker side of life, you can enjoy anything to do with forensics, like a forensics accountant or forensic pathologist, as well as professions like a medical examiner or psychologist. Some other Scorpio professions are: detective, profiler, cryptographer, investigator, antiques dealer, researcher.

## **HEALTH:**

Scorpio rules the sexual organs, so you can have reproductive health issues and struggle with fertility, have a low sperm count, or difficulty producing eggs. Ovarian cancer, uterine cancer, or cancer of any of the elimination organs is possible. You also need to watch your sexual behavior to avoid sexually transmitted diseases. For women, you may have difficult menstrual cycles, suffer terrible PMS/PMDD, or have reactions to birth control. Scorpio rules your hormones, and you can see problems with overproduction or underproduction of hormones.

## **CHILD & PARENT:**

As a child, you weren't as social as the other kids, and felt misunderstood. You were far more serious than everyone else was your age, and they didn't understand why you acted that way. You saw the world with grim eyes, even as a child, and it was hard for you to be happy-go-lucky. You understood sarcasm and dark humor young, and seemed older than your years. You were sensitive emotionally and could have temper tantrums like no one else.

As a parent, you try to be a strong figure for your children, and you understand their pain in ways most don't. When someone hurts them, you want to go after that person, despising them for hurting your child. You should let your children bring out the inner child in you and see them as an opportunity to have that kind of fun that you didn't have when you were a kid.

## **FRIEND & ENEMY:**

As a friend, you're loyal to them, but you don't have many of them. You've likely always been the misunderstood loner, and have trouble meeting people who get you, and as a result, have very few friends. The few you do have, you'll keep them forever, but you may still have a hard time opening up to them. You have to learn that you can't bottle everything up all of the time. It's hard to form the kinds of bonds that you crave with people if you don't.

As an enemy, you're the worst in the zodiac. You forgive nothing and forget nothing, and with your rage, you want vengeance when you've been wronged or betrayed. You'll go out of your way to get back at them, and no matter what you do to them, it'll never be enough. You need to work on learning to let things go and learn the art of forgiveness, otherwise your obsession with destroying others will only lead to the destruction of yourself.

## **AS A PET:**

Your Scorpio pet likes to keep things to themselves, and figuring out what they want or what's wrong with them can be a challenge for you. They like to spend time by themselves, and aren't fond of being around a lot of people. They have a long memory and won't forget if anyone did anything to hurt them. They'll probably attack them whenever they see them. They don't show a lot of emotion, but when they get angry, they have major wrath. For the most part, they're pretty quiet though, and

don't have a lot of energy. They hide and it can take time for you to get them to open up to you. Once you do, they're fiercely loyal, but they believe they own you, and not the other way around. When you need them, they'll be there for you, and when you're upset, there's nowhere else they'd rather be than with you. They're also quite protective of you, and will fight anyone or anything that tries to hurt you.

### **When you're GOOD:**

You believe life is a serious matter, but know that it's okay to laugh at the ridiculousness sometimes. You can focus and be researching, but you don't let yourself get too consumed by anything. You see the light in the darkness, and can be realistic about the positive opportunities around you. You can change the things you're not happy with, and find your own happiness.

### **When you're BAD:**

You're so intense that you scare serial killers. You don't know how to lighten up to save your life. You take everything so seriously, like it's all life and death, and you miss out on the fun and good times to be had. You point out all of the bad things out there, as pessimistic as you can be, and bring other people down with you. The glass is half empty, and you throw it against the wall in frustration.

### **GENERAL:**

Scorpio, you are the eighth sign in the zodiac, and the most intense by far. No one can match your intensity, your passion, and you take this approach to everything you do. There's no shortage of passion in your relationships, your work, your life, but it can be overwhelming at times. Life is a serious matter, but if you don't take a break from that every so often, have moments of light-hearted fun and laughter, you won't find the happiness that you're looking for.

You are serious, and you take life seriously, and you're a focused, determined person who can take on a lot of responsibility. Where many others falter, you keep going. It seems that when the going gets tough, you get going, and when it gets tougher, you get tougher. You rise to the occasion, and even when you fail, you don't actually fail. You learn from your mistakes and you come back smarter and stronger. That's why Scorpio is associated with the phoenix rising from the ashes. You're not afraid of change as long as it's for a good reason, and you're constantly looking at your life to see what areas need to be transformed.

While most people shy away from the darker parts of themselves, you embrace them. You see beauty in the darkness, and revel in it. You just have to watch out for living your whole life in the dark, because that won't help you. You're emotional, in the extreme at times, and can seem moody. You can fly into extreme fits of emotion, and your rage is especially impressive, though not usually warranted. You feel so deeply

that everything gets you at your core, and you need to learn how to handle your feelings in a way that won't be so destructive. It would be good for those around you and for yourself because you won't put yourself in bad situations as a result of your outbursts. You're a dedicated sign, and once you put your mind to something, it takes an act from the great beyond to stop you. Success is always within reach.

## SAGITTARIUS: November 22nd - December 21st

SYMBOL: The Archer

COLOR: Purple

ELEMENT: Fire

QUALITY: Mutable

PLANETARY RULER: Jupiter

DAY: Thursday

NATURE: Semi-barren

POLARITY: Masculine

DIRECTION: East by South

TAROT CARD: XIV Temperance

Mercury is in detriment (weak) in Sagittarius

Venus is strong in Sagittarius

## LOVE:

Sagittarius is known as the sign of the eternal bachelor, and for many of you, settling down doesn't come until later in life. You spend your younger years dating up a storm and never taking it to any serious place or dating them for very long, preferring flings and casual relationships with no strings. Even though you don't keep people around long romantically, you tend to keep them around as friends, and have many ex-lovers-turned-friends. Somehow, you manage it. You rarely lie about the fact that you're not looking for anything serious, and you don't try to hurt anyone with your flings, so people know what they're getting. You're terrified of being tied down, and this creates a fear of commitment for you for a long time. You worry about losing your independence by being in a relationship, so you need someone who will allow you to be you and not be clingy or push you too quickly, though they should push you a little, otherwise you'll never get to another level. At some point, you do tire of running, and you should look at love as another adventure for you to have. It's just another of life's experiences.

The signs that you're most compatible with tend to be the signs that are in the same element as yours, which are Aries and Leo. Both of these signs share your zest for life and can keep up with your fast pace. Aries shares in your youthful spirit, and Leo shares in your laughter. Aries will show you how to take charge, and Leo will be the romantic. Both of these signs are easy to get along with for you. The sign that opposes yours in the zodiac tends to be the one that you have the most sparks

with, and for you, that's Gemini. Their cool demeanor seems cold to you, their overly-mental approach seems boring, and you don't know why they won't just do something, but you're drawn to them anyway, and they can teach you to think things through more thoroughly, while you can help them become confident.

## **MONEY & CAREER:**

When it comes to money, you're a big spendthrift. You love to spend money, and when you blow it, you can blow it in a big way. At the same time, you can have an easier time than most getting your hands on the money that you need when you need it, almost seeming to be lucky. You can come up with big ideas for ways to make money, and they may seem like harebrained head-scratchers to everyone else but make perfect sense to you. You figure, if you're going to take a chance on something, it might as well be something with a big return, and gambling with a lot of money isn't as scary to you as everyone else. Oh, and gambling can be an issue for you too. One thing you aren't is a miser though, and you'll give away your money without a second thought to your friends, family, and charity. You don't expect to be paid back when you give someone money, but you're not great with paying back loans either. You just forget about them.

When it comes to your profession, you need a job where you can work largely by yourself. It's not that you don't work well with others, and just that you can forget to touch base with people, come up with big ideas

of your own that you want to pursue and not see how the group feels about it, and come up with such big ideas that no one else understands. Many of you can be entrepreneurs, always trying to start your own business. With your way with words, you can be good writers, publishers, or work in television or radio. Being good salesmen, you can work in sales or advertising. With how much you care about learning, you can be a teacher (but not usually of small children). Some other Sagittarius professions are: philosopher, athlete, lawyer, theologian, engineer, pilot.

## **HEALTH:**

Sagittarius rules the hips and upper legs, so you can have bad hips, hips that dislocate, constantly pull your hamstrings, and have other issues. You want to work on strengthening your legs because it'll help prevent injury. Injury tends to be the thing that you have to deal with most as opposed to major health issues, and you're generally a healthy sign. It pays to be ruled by happy planet Jupiter!

## **CHILD & PARENT:**

As a child, you were full of energy and optimism, and you loved to pretend that you were on an adventure. You dreamed big and no one could tell you that you wouldn't accomplish your dreams. You were incredibly honest and blunt, which no doubt put your parents in embarrassing situations. You were curious about the world, wanting to

learn more about other ways of living, and open to those who were different from you.

As a parent, you bring your sunny approach to your dealings with your children. You try to show them that there's a bright side to every situation, and help them be positive people. You love to crack jokes with them and create great memories of good times filled with laughter. There are times where it may seem like you're the child, not them, especially if you have a rather mature child. You need to make sure that you're always the parent, not them.

### **FRIEND & ENEMY:**

As a friend, you're one of the best to have. You love your friends to pieces, always want to show them a good time, and are much more accommodating of them than of the people you date. You don't see your friends as a threat to your independence, so you're able to relax with them and be your best self. You tend to have many friends with a diverse social circle, and you're always looking to learn from them.

As an enemy, you can be spirited in the heat of the moment, but you rarely hold a grudge, so it doesn't last long, and you're moving on to your next grand adventure. You don't have much of an appetite for vengeance, and you don't see the point in it. You have too much else that you want to do in your life to waste one second of it on something like that.

## AS A PET:

Your Sagittarius pet is always up for an adventure. They love to travel and go to new places, and they have plenty of energy to roam and explore. Keeping them locked up is one of the worst things you could do to them. They need to be free! They love the outdoors and need plenty to do. Physical exercise is important for them, and if you're someone who loves the great outdoors and is super active, they could keep up with you. They don't take anything very seriously, have a light-hearted disposition, and always seem happy. They may be of the mischievous sort though, much to your chagrin, but they usually walk away unharmed. They're quite curious and that's part of what makes them want to explore. They may get into your business a little too much, always wanting to see what you're up to. They're a great friend and love to spend time playing with you. They're like little children with their enthusiasm, glee, and spunk, and they'll bring a smile to your face.

## When you're GOOD:

You enjoy freedom, but know that having relationships and responsibilities can be their own adventure too. You take a positive attitude into everything that you do, and can see the upside to committing yourself to something. You don't want to wander aimlessly forever, and have a goal, a target, a dream. You can grow up, knowing that the kid at heart doesn't have to fade.

## **When you're BAD:**

You can't stop running for longer than two seconds, afraid of being tied down to anyone or anything. You want to run all of your life, and never let yourself get in too deep anywhere. You can't stand the idea of commitment or stability, wanting a never-ending adventure for your life, but you never grow up. You never become an adult, and you never take control of or responsibility for your life.

## **GENERAL:**

Sagittarius, you are the ninth sign in the zodiac, and are known as the happy-go-lucky sign. You see the positives everywhere you go, always looking on the brighter side of things, and are an optimistic person. You don't see why you shouldn't be, but there are times when you need to take life seriously, and sometimes you don't know when those times are happening right in front of you.

For the most part, your happy attitude is an asset, and it allows you to be confident and believe that you can accomplish anything. This is why you tend to be a successful sign, because your optimism and belief in yourself keeps you from staying down when you fail. You jump right back up and try again or go for something new, and you do that over and over again until you finally succeed. People say you're lucky, but that doesn't give you the credit you deserve.

You're friendly and engaging, full of conversation and stories to tell of your grand adventures, and people love to hear you tell a story. You may embellish a little, but only in the spirit of telling the story. For the most part, you're an honest person because you're so blunt. You don't think much before you speak, and out pops the truth, whether you want to say it or not. A filter would be a good thing for you.

Because of your friendly nature, you have many friends, and you have no problem making new friends or socializing with people that you don't know. You're bold and daring, and always up for a new adventure, wanting to explore the world, learn about cultures and beliefs that are different from your own, and spend time in exotic places with exotic people. There's a big world out there, and you don't want anything to hold you back from exploring it.

## CAPRICORN: December 22nd - January 19th

SYMBOL: Goat

COLOR: Brown

ELEMENT: Earth

QUALITY: Cardinal

PLANETARY RULER: Saturn

DAY: Saturday

NATURE: Semi-fruitful

POLARITY: Feminine

DIRECTION: South

TAROT CARD: XXI World

The Moon is in detriment (weak) in Capricorn

Mars is exalted (strongest) in Capricorn

Jupiter is in fall (weakest) in Capricorn

Mercury is strong in Capricorn

## LOVE:

You don't make a lot of time for love in your life if you have goals that you want to achieve. You'll sacrifice a love life if it'll help you get closer to attaining the goals that you've set out for. Because of this, you usually don't date as much when you're young, and tend to find someone to settle down with at an older age. It actually puts you in a better position than everyone else because you're wiser, you've lived some life, you know what you want, you won't put up with nonsense, and you've already established your life so you're not looking for someone to make you happy, only add to your life. Commitment isn't a scary concept to you, and you take it very seriously. You're dedicated to your partner, and you can be with someone for a long time. You'd rather be in a relationship or be single, and forgo that in-between stuff. Either someone is worth your time or they're not. You remain detached for a long time, so if you decide someone isn't worth your time, you don't feel like you invested too much. It takes effort for someone to get you to open up, and you need to know you can trust them. When you do open up, it's serious.

The signs that you're most compatible with are usually the ones in the same element as yours, which are Taurus and Virgo. Both signs want a stable life like you do, and they won't rock the boat. Taurus will share in your love of luxury, and Virgo will share in your hard work ethic. Taurus will show you how to put work aside and take time off, while Virgo will show you to be more adaptable to situations. It's easy for you to be

comfortable with these two signs. The sign that opposes yours in the zodiac tends to be the one you have the most sparks with, and for you, that's Cancer. Their sensitivity is disconcerting and their moodiness aggravates you, but something brings you together that you can't explain, and they can be wonderfully supportive of your endeavors and great cheerleaders who give you a comfortable home to escape to, while you help them feel secure and confident.

## **MONEY & CAREER:**

When it comes to money, you're very careful about making decisions. You don't want to feel rushed into anything, and you don't want to fall prey to any schemes. You know people will do anything to take your money, and you're extra cautious to make sure that doesn't happen. You carefully take in all information and make detailed plans for your financial future. You create budgets that you stick to, but you don't have any problem buying items that are incredibly expensive, just because they show the kind of status you want. The more of those types of items you have, the more you feel that you've succeeded in life, but you won't spend the money if you don't have it. You want stability and understand that means being smart financially. You'll lend money to friends and family if you have it to spare, but you'll make sure they pay you back, and even create terms for it.

When it comes to your profession, you're an incredibly hard worker once you've set your mind to a goal. You try to be practical in your

approach to your goals, but you can make pretty big goals for yourself. You believe in yourself and that you'll do anything you want. Being so ambitious, many of you can be great politicians (and Capricorn rules politicians). You can also work for the government in some other capacity. You don't want a job where you'll be working hard for someone else and you're never recognized for your work. You also can have a hard time taking orders, and would much rather be the boss and delegate tasks. Some of you are downright bossy! But really, you feel comfortable being in charge, and think you do a better job at it than most, so you can be CEOs and run major corporations. Some other Capricorn professions are: carpenter, dentist, orthopedist, civil engineer, chiropractor, mason.

## **HEALTH:**

Capricorn rules the bones and joints, and you can have issues with arthritis, osteoporosis, and especially bad knees, which can even give you trouble young. Capricorn also rules the gallbladder, so watch for gallstones. Capricorn is one of the signs that can be plagued with skin problems, and that can include acne for some, but it's usually dry skin problems, like psoriasis, eczema, and general itching. You need to make sure your skin is well moisturized and you drink plenty of water.

## **CHILD & PARENT:**

As a child, you seemed more mature than the rest of the kids. You were quiet, always thinking about issues that were beyond your age, and

preferred to spend time with people who were older than you. If you had friends, they were only a few, and they were likely older. Usually, you had a hard time making friends, and spent more time with your older relatives, especially your grandparents.

As a parent, you're encouraging and supportive, wanting the best for your children. You provide a stable home for them, and try to give them the best of everything. You impart a great deal of wisdom to them, and don't want to keep them from growing up. As long as you're not tragically ambitious, sacrificing your family for your career success, you can be one of the best parents in the zodiac.

## **FRIEND & ENEMY:**

As a friend, you're a hard one to have. You don't put much stock in friendships, usually having many acquaintances that you're not close to and are for some other purpose. You have a hard time opening up to people, and you focus so much on your goals that friendships tend to be one of the things that you sacrifice in your quest for success. If you can make room for friends in your life, you're loyal and encouraging.

As an enemy, you have one of the longest memories in the zodiac, and you won't forget when someone hurts you. Since you're concerned about the way that you come across, you may not do much about it, at least not in any way where it can be traced back to you. You don't want the world to know about your vengeance if you seek it. For the most

part, you'll grit your teeth and move on begrudgingly, but never forget what was done to you.

## **AS A PET:**

Your Capricorn pet knows that every action they take will lead to something, and they think their actions through because of that. Whoever has what they want will get their affection. For the most part, they're not all that affectionate, and prefer to be on their own. They don't have a ton of energy either, but they are quite smart. When around other animals, they're the leader, and others look to them for guidance, but they generally don't bond with other animals easily, and it takes time for them to bond with humans as well. They don't like bowing down to anyone, but they are loyal, and tend to be easier to train. Positive rewards are useful with training them. They may have had a hard time when they were young for some reason; maybe they were abandoned or neglected, maybe they had some sort of physical difficulty or illness, etc. Like any Capricorn, they get better as they get older, and they lighten up and become more lively with age. A wonderful animal to grow old with!

## **When you're GOOD:**

You have goals for what you want in life, and you know how to achieve them, but you also understand that you need to have a well-rounded life, and that success comes in many forms. You work at being a successful person professionally and personally to find true fulfillment.

You know when to put work aside and embrace life, getting in touch with your passions and heart.

## **When you're BAD:**

There's only one thing that you care about, and that's success. You don't care who you have to run over to get it, even if that's your grandmother. You're tragically ambitious and don't realize how bad that is. You can be so practical that you're a fuddy-duddy, unable to use your imagination or look outside of the box. You can be such an adult that you're a bore, and lack a real personality.

## **GENERAL:**

Capricorn, you're the tenth sign of the zodiac, and known as the most ambitious of them all. When you set a goal for yourself, you won't stop until you achieve it. You don't care what you have to sacrifice to get it, and can sacrifice too much at times, which is what makes people say that you're tragically ambitious. Success is pretty empty if you don't have a well-rounded life, but it may take you time to learn that.

You always seem to be older than you are when you're young, and as you get older, you seem younger. You age in reverse! When you're young, you're serious, a loner, and concerned with big issues, but as you get older, you learn how to have fun and get in touch with your inner child. You set yourself up when you're young to have a stable life with

security as you get older, and you don't have to worry about those things anymore.

You're responsible, not having any trouble with your duties, and you try to do the right thing. You take life seriously, seeing the reality of life and understanding how difficult it is to survive. Sometimes you can get lost in the seriousness and become pessimistic, and you have to work on finding the positives. Your early life may have been difficult for you, but somewhere along the way, it all just clicks for you, and you have an easier time being an adult than being a kid. You can be more of a kid as an adult than when you were that age!

## AQUARIUS: January 20th - February 18th

SYMBOL: The Waterbearer

COLOR: Sky Blue

ELEMENT: Air

QUALITY: Fixed

PLANETARY RULER: Uranus

DAY: Saturday

NATURE: Semi-barren

POLARITY: Masculine

DIRECTION: West by North

TAROT CARD: XVII Star

The Sun is in detriment (weak) in Aquarius

## LOVE:

You're not one to settle down for some time. You love being independent and free, and you don't want to tie yourself down right away. Once you do tie yourself to someone, you're surprisingly loyal and won't stray. You usually want to be friends with someone before you date them so you can spend time getting to know them on a mental level. Having a mental connection is the most important thing for you. Without that, you get bored and walk away. You'll need to force yourself to find an emotional connection with someone, because a mental one alone isn't enough and won't sustain you forever. They need to share some of the same causes that you do, and care just as much about helping the world as you do. You need someone who's intellectually stimulating, a fellow philanthropist, and has some fire in them to bring the passion. Your cool, aloof exterior can attract many people to you, but you can lack in the passion department, so it's helpful if they can bring it into the relationship.

The signs that you tend to be the most compatible with are usually in the same element as yours, which are Gemini and Libra. Both signs will provide the mental stimulation that you're looking for. Gemini will help further your curiosity, and Libra will help cultivate your artistic sense. Gemini will show you an emotional side, and Libra will be romantic. It's not hard for you to mesh with either of these signs. The sign that is opposing yours in the zodiac tends to be the ones you have the most sparks with, and for you, that's Leo. Their desperation for attention is

something you don't understand, their fiery nature goes against your cool one, and you wish they weren't so dramatic, but you can't help but be drawn to them somehow, and you can be an interesting pairing of fire and ice.

## MONEY & CAREER:

When it comes to money, you usually don't care much about it. You only see it as something that you need to be able to do certain things, but rarely aspire to have a ton of money. You have other aspirations, dreams that you want to achieve, and if you need money to attain them then you'll find the money for it, and if you get rich from it, that's fine with you, but it's not the reason you have these dreams in the first place. Often, when you do have money, you don't have it for every long, and you give away a lot of it to charity, friends and family who need assistance, or to pursue some other new dream. You tend to keep it simple, and don't care much for going out shopping every day, but you do prefer quality items, so when you do spend money, it's only on the best.

When it comes to your profession, you're an inventive, innovative person who's always coming up with a new idea, new solution, and don't want to do things the way they've always been done. For that reason, you make good inventors and entrepreneurs, and many of you may find it difficult to work for someone else because you don't want to be put in a box. Working for yourself just makes sense because you can

do things your own eccentric way. Given your penchant for science, you can work as a scientist, physicist, or in research. Since you're so open to everyone, you can make a good civic leader, humanitarian, or social worker, or lead a new movement. You can also work with the latest technology, developing and trying to come up with the next big thing, or work with the internet. Some other Aquarius professions are: astronaut, astrologer, electrical engineer, psychologist, teacher, politician.

## **HEALTH:**

Aquarius rules the lower legs, so you can experience issues with your calves, shins, and ankles. You may suffer cramps or spasms in that area, or have poor circulation to your lower legs, resulting in spider or varicose veins. Do what you can to increase the blood flow to your legs, and stretch your legs adequately before you exercise so you don't pull any muscles.

## **CHILD & PARENT:**

As a child, you had many friends and always wanted to spend time with them. You didn't like being idle so you kept busy, joining lots of groups and being very social. You got along with everyone, and you had an intellectual interest in a vast array of subjects. You wanted to experiment with many different ways of living, and seemed like a rebel, but you just wanted to experiment and experience new things for yourself.

As a parent, you don't want to put your child in a box, and encourage them to be their true self. You help them try out new things, whatever they want to pursue, and you teach them to have an open mind. They don't have to worry about being too different, because you'll cheer them on no matter what. You only have an issue if they turn out to be too conventional - then you wonder what you did wrong!

## **FRIEND & ENEMY:**

As a friend, you have plenty of them, and you love to be around them. You seem to come alive when you're with your friends. You make friends with people of all ages and backgrounds, open to anyone and everyone. You have an active social life, participate in many groups, and have many casual friends, but very few real ones. You have a hard time opening up emotionally, which makes most of your friendships superficial. You have to open up if you want real friends.

As an enemy, you can have a bit of a temper and sometimes hold a grudge, but you don't act out too much. You may make elaborate plans for how to get back at someone, and spend so much time thinking about it that eventually, you just move on and rarely actually pursue that plan. In your head, you'll get back at them, but in real life, you don't bother.

## **AS A PET:**

Your Aquarius pet loves to be around people and other animals. They can get along with anyone, and they're usually the one everyone flocks to. They're easy to get along with, have a cool demeanor, and are quite sociable. Being alone may be hard for them, so it's good if they have another (or quite a few) animal companion. They can over-think and need to have people and animals around them to keep them occupied. They may seem like they always have something to say, and could be quite expressive (a lot of barking, meowing, mooing, etc.). With their active mind, they're quite smart, and they can learn tricks easily. They also do well working, and need plenty of physical activity. They can be all over the place with their abundant energy, and have a hard time focusing if they aren't given outlets, or are downright anxious and fidgety. They may find electronics interesting, and could be taught to play with some of them. They'll play a lot with you too!

### **When you're GOOD:**

You love to learn and become an expert with new things, but you know that there's only so much you can learn in a book or classroom, so you embrace actual experience with your fellow humans. You want to grow closer with others as a way of understanding them and humankind better. You have hopes and dreams like all of us, but you know that you have to appreciate what you already have.

### **When you're BAD:**

You're so focused on the future and what you hope for that you miss

everything in the present and what you already have. You become consumed with learning new things, and live in your mind so much that you don't understand the most important thing of all: feelings. You don't understand that you can't read about them in a book, you have to let yourself feel them.

## **GENERAL:**

Aquarius, you're the eleventh sign in the zodiac, and known as the humanitarian. You care about helping the world as a whole, and pursue causes that are grand and will tackle a larger issue. You want to help save the world from itself. With your innovative mind, you come up with solutions to problems that are radically different from anything that's been done before, and you can use this in your personal life as well as when you're trying to further a cause.

Your mind is sharp and quick, always coming up with new ideas, and you think big when it comes to the future. The future is always a concern of yours, and you're constantly thinking about what will come. This makes it hard for you to live in the moment or deal with the past though. You have to wrangle your mind enough to be in the present or to work out old issues.

You're someone who believes passionately in being who you are, and you won't apologize for that. You may seem odd or strange to people, but you don't care. You do things your own way, and if that's different

from everyone else, so be it. You'd rather be you than put yourself in a box. Whenever anyone tries to put you in a box, you rebel against them in a major way. It's an insult to you that they would do that. There are times when being conventional is the only or best option though, and you need to be open to that as well, otherwise you just hold yourself back for no good reason.

Being such an intellectual sign, you can have a hard time processing your emotions, and you detach yourself from them rather than deal with them. This makes it hard for you to connect with other people below the surface. Try to see embracing your feelings as a learning experience. It's one that you need to have. Once you can get in touch with your feelings, you'll be an inspiring person.

## PISCES: February 19th - March 20th

SYMBOL: The Fish

COLOR: White

ELEMENT: Water

QUALITY: Mutable

PLANETARY RULER: Neptune

DAY: Thursday

NATURE: Fruitful

POLARITY: Feminine

DIRECTION: North by West

TAROT CARD: XVIII Moon

Mercury is in detriment (weak) in Pisces

Venus is exalted (strong) in Pisces

Mercury is in fall (weak) in Pisces

## LOVE:

You're a romantic sign, and you go for the sappy stuff. You want someone to sweep you off of your feet, just like in your favorite book or movie. You fall for people hard and fast, and you cling to them once you do. A little detachment would be a good thing for you, and taking time to get to know someone. You have a natural charisma that draws people to you, but you need to be more discerning with who you give a chance to. Many of you go for the person who needs the most help and you try to save them, but it doesn't work out and you just end up hurting yourself. Don't take on a project! Find someone who is already whole. You need someone who will be sensitive to your feelings, and won't trample all over them whenever they feel like it. Don't let yourself be with someone who treats you badly. There isn't any excuse for that. It would be helpful for you to cultivate better self-esteem and confidence because that would keep you from going for these people who are so wrong for you.

The signs that you're usually the most compatible with are the ones in the same element as yours, which are Cancer and Scorpio. These two signs understand your emotional nature and can be quite sensitive as well. Cancer will be supportive, and Scorpio will be passionate. Cancer wants to nurture and give you a wonderful home, and Scorpio wants to help you grow and evolve into a better person. Both of these signs will connect with you on an emotional level. The sign that opposes yours in the zodiac tends to be the one you have the most sparks with, and for

you, that's Virgo. Their analytical nature is puzzling, their emotional distance is cold, and you see their realism as pessimism, but there's something there that you can't describe between you, and they can teach you to be more practical, while you can teach them to be more imaginative.

## **MONEY & CAREER:**

When it comes to money, you have many ideas for how to make money, and like to dream big with those plans, but you have a hard time with action. You don't know what to do next, how to make things happen, and nothing happens, even if you have a billion-dollar idea. Even when you do pursue a venture, you have a hard time sticking to it, and walk away easily, which keeps you from having the financial success that you could have had if you stuck with it. Many of you will pair up with someone who has money, and when it comes to spending money, you do a good job with it. You tackle the necessities first and make sure there's some mad money left so you don't feel like you're sacrificing anything and forcing yourself to live below your means. What you really need to do is listen to what your intuition tells you to do when you're making financial decisions. As the most intuitive sign, it won't steer you wrong.

When it comes to your profession, you come up with big dreams of what you'd like to pursue, but then do nothing about it, or give up when it gets hard. You say you'll do this and that, but you don't give it a real

shot. Your fear drives you to keep yourself back, and you need to let it go if you'll ever be successful. Since you're such an intuitive sign, you could make good psychics, spiritualists, or healers. With your active imagination, you can be a writer, especially of fantasy, and with Pisces ruling music, you can also work in the music business. Pisces rules confined institutions, so you can work in a hospital or prison. You can also do something with water, like being a lifeguard, working on a boat, being a boat captain, or working in the navy. Some other Pisces professions are: podiatrist, bartender, chemist, artist, veterinarian, chemical engineer.

## **HEALTH:**

Pisces rules the feet, and you can have a bad arch, need to wear certain types of footwear for support, and get corns or bunions. A foot massage would be a good thing for you regularly, and make sure you wash and moisturize. Pisces also rules the lymphatic system, and can be prone to getting sick often. You especially need to steer clear of toxins because you absorb them easily, and it wreaks havoc on your body. While Pisces rules escapism and many seek refuge in drugs, that's about the worst thing you can do. You're a nervous sign since you're so sensitive, and you need to address your emotional needs in a healthy way.

## **CHILD & PARENT:**

As a child, you were quiet and didn't want to bother anyone. You kept to yourself, and with an active imagination, you kept yourself occupied.

You were highly sensitive and were likely sent into tears many times by your peers. You felt like the world was so big and so scary, so you looked at it in innocent wonder and fear. You didn't care much for going on an adventure, preferring to go on adventures safely tucked away in your own room.

As a parent, you're sensitive to your children's emotions and needs, and when they hurt, you hurt. You try to comfort them as much as possible, giving them lots of affection, hugs and kisses, showing your love for them often. You expose them to fantasy, and encourage them to use their imaginations. You want them to just be kids for a while, and not be in a rush to grow up.

## **FRIEND & ENEMY:**

As a friend, you have a hard time approaching people, so the friends that you do have are ones that initiated first contact. You need friends who aren't cruel or mean-spirited, and are sensitive to your feelings. You'll always be sensitive to theirs, and when you're alone with them, you can have fun and let loose. You crave closeness, and you want to feel as close to your friends as possible. Just don't cling.

As an enemy, you fall apart when someone really hurts you, but you'll rarely do anything about it. In fact, you might even give them another chance because you believe in second chances, but unfortunately, not everyone deserves that, and you get hurt once again. It's hard for you to

stay angry with them, and you see so much good in them that you keep hoping for the best. It would be good for you to stand up for yourself more and not let people walk all over you.

## **AS A PET:**

Your Pisces pet is probably the sweetest, most gentlest animal you've ever met in your life. They love you unconditionally, and they show it, being quite affectionate and sweet. They're kind to every human and animal they encounter, though they may be so shy that they run away and hide. They live to be close to you and want you around at all times. If you yell at them, you hurt them deeply, so try not to be too hard on them. A firm voice is all that's needed with them. When you're hurt or sick, they want to take care of you. Same goes for any other animals you have. They're excellent caretakers and companions. You may be able to tell a lot from their eyes. They can have a hard time in places that are loud or have too much going on. They enjoy being around water, so keep water nearby and let them swim if you can. You swear they can read your mind sometimes, giving you a blanket when you feel a shiver or rubbing your leg when you're feeling lonely. A wonderful quality!

## **When you're GOOD:**

You're a compassionate person, feeling things very deeply, which helps you to understand what other people are going through. You have ways that are positive and healthy to deal with your feelings so you don't have to check out, and while you have a great imagination, you can see

reality. You try to make your daily life as whimsical as possible so you can keep life interesting.

### **When you're BAD:**

You're so sensitive that you have a hard time dealing with other people. Instead, you try to escape from the world, getting lost in your fantasies, illusions, delusions. You can go so far that you become lost to the world forever, convinced that your fantasies are your only way of dealing. You don't understand logic or reason, and you don't want to deal with the mundane or routine or structure, feeling bored with it.

### **GENERAL:**

Pisces, you're the twelfth and last sign of the zodiac. As the last sign, you've absorbed all of the lessons the other signs have learned along the way, and this is what makes you sensitive and intuitive. You feel deeply, not only for your own pain but everyone else's. You want to help each and every person in the world with their problems. Your sensitivity can overwhelm you because you feel too much at times, and need to get control over your emotions, otherwise they'll control you and you'll always be a train wreck.

Your intuition is far beyond everyone else's because you're so sensitive to the subtle energies around you, and it would serve as a good guide for you. If you can trust your instincts, they'll keep you going in the right direction, and you can believe in yourself. You just have to shed the fear

that holds you back, but that's not easy for you to do. There's too much to be scared of in the world, and when you get hurt, you can fall apart at the seams.

You need to have enough security in your life that you don't fall apart all of the time, and need people in your life that support you. With a good support system, you can thrive. You need to know that someone will be there to catch you if you fall. If you have that, there is little you can't do with your intuition guiding you and an imagination that knows no limits.
